28

1 Sun Microsystems, Inc. ("Sun") hereby objects on the following grounds to the
 2 Declaration of David Hitz ("Hitz Declaration") and Declaration of Stephen G. Kunin ("Kunin
 3 Declaration") filed in support of Network Appliance, Inc.'s ("NetApp") Opposition to Sun's
 4 Motion for Partial Stay.

5 I. ANALYSIS

6 Civil Local Rule 7-5(b) states, in relevant part, that: "[a]n affidavit or declarations may
 7 contain only facts, must conform as much as possible to the requirements of FRCivP 56(e), and
 8 must avoid conclusions and argument.... An affidavit or declaration not in compliance with this
 9 rule may be stricken in whole or in part." Rule 56(e) of the Federal Rules of Civil Procedure
 10 states, in relevant part, that: "supporting and opposing affidavits shall be made on personal
 11 knowledge, shall set forth such facts as would be admissible in evidence, and shall show
 12 affirmatively that the affiant is competent to testify to the matters stated therein." Fed. R. Civ. P.
 13 56(e).

14 Here, the Hitz Declaration and the Kunin Declaration fail to comply with both the Federal
 15 Rules of Civil Procedure and the local rules of this Court for the reasons set forth below. As
 16 such, Sun requests that the following paragraphs be stricken from the record.

17 DECLARATION OF DAVID HITZ

18 1. Sun objects to paragraph 3 of the Hitz Declaration on the grounds that it is an
 19 improper and inadmissible legal conclusion and lacks foundation. Evid. Code §§ 602, 701.
 20 Because Mr. Hitz is not qualified to express a legal opinion and has not been designated by
 21 NetApp as an expert regarding legal issues, testimony regarding the scope of NetApp's patents is
 22 inadmissible. Evid. Code § 701. Accordingly, paragraph 3 of the Hitz Declaration should be
 23 stricken by the Court.

24 2. Sun objects to the following sentence in paragraph 5 of the Hitz Declaration on the
 25 grounds that it is argumentative, speculative, lacks foundation and directly contradicted by the
 26 purported evidence attached to the Hitz Declaration: "Sun's ZFS technology appears to be a
 27 conscious reimplement of NetApp's innovative WAFL filesystems, as admitted by the
 28 creators of ZFS:..." Evid. Code § 602. Specifically, Mr. Hitz has not and cannot articulate any

1 personal knowledge concerning whether Sun's ZFS technology was a "conscious
2 reimplementation of NetApp's WAFL filesystems." Accordingly, paragraph 5 of the Hitz
3 Declaration should be stricken by the Court.

4 3. Sun objects to the following phrases of paragraph 8 of the Hitz Declaration: (1)
5 "...given away for free NetApp's patented technology to anyone that wants to download a copy;"
6 (2) "...Sun has created infringing computer code and made it easy for software users and software
7 companies everywhere to infringe;" and (3) **REDACTED**

8 Sun objects to
9 these phrases on the grounds that they are argumentative, speculative, an improper and
10 inadmissible legal conclusion and lack foundation. Evid. Code §§ 602, 701. Because Mr. Hitz is
11 not qualified to express a legal opinion and has not been designated by NetApp as an expert
12 regarding legal issues, testimony regarding whether Sun is giving away "NetApp's patent
13 technology" and whether "Sun has created infringing computer code" is inadmissible. Evid.
14 Code § 701. Moreover, Mr. Hitz has not identified any foundation, personal knowledge or
15 support for his assertion that the **REDACTED** Accordingly,
16 these phrases of paragraph 8 of the Hitz Declaration should be stricken by the Court.

17 4. Sun objects to paragraph 9 of the Hitz Declaration on the grounds that it is
18 argumentative, lacks foundation, speculative and an improper and inadmissible legal conclusion.
19 Evid. Code §§ 602, 701. Because Mr. Hitz is not qualified to express a legal opinion and has not
20 been designated by NetApp as an expert regarding legal issues, testimony regarding infringement
21 is inadmissible. Evid. Code § 701. Moreover, this paragraph is pure argument and, therefore
22 inadmissible. Accordingly, paragraph 9 of the Hitz Declaration should be stricken by the Court.

23 5. Sun objects to the last sentence in paragraph 10 of the Hitz Declaration on the
24 grounds that it is an improper and inadmissible legal conclusion, lacks foundation, speculative
25 and argumentative. Evid. Code §§ 602, 701. Specifically, because Mr. Hitz is not qualified to
26 express a legal opinion and has not been designated by NetApp as an expert regarding damages,
27 testimony regarding the alleged damage to NetApp is inadmissible. Evid. Code § 701.
28 Accordingly, paragraph 10 of the Hitz Declaration should be stricken by the Court.

6. Sun objects to paragraph 11 of the Hitz Declaration on the grounds that it is speculative, lacks foundation and an improper and inadmissible legal conclusion. Evid. Code §§ 602, 701. Because Mr. Hitz is not qualified to express a legal opinion and has not been designated by NetApp as an expert regarding infringement and damages issues, testimony regarding whether Sun is “exploiting NetApp’s patented technology” and whether
REDACTED is inadmissible. Evid. Code § 701.

Additionally, Mr. Hitz has not and cannot articulate any personal knowledge regarding whether Sun “does not have to cover the true cost of incorporating ZFS into the Sun Fire X4500....” Finally, Mr. Hitz’ testimony regarding future events concerning what NetApp might have to consider in response to market pressures is speculative and lacks foundation. Accordingly, paragraph 11 of the Hitz Declaration should be stricken by the Court.

7. Sun objects to paragraph 12 of the Hitz Declaration on the grounds that is argumentative, speculative and lacks foundation. Evid. Code § 602. Specifically, Mr. Hitz has not and cannot articulate any personal knowledge regarding what Sun will introduce into the marketplace in the next three to five years. Accordingly, paragraph 12 of the Hitz Declaration should be stricken by the Court.

8. Sun objects to paragraph 13 of the Hitz Declaration on the grounds that it is argumentative, speculative and lacks foundation. Evid. Code § 602. Specifically, Mr. Hitz has not and cannot articulate any personal knowledge regarding what third party companies might do in the future. Indeed, Mr. Hitz’ lack of personal knowledge is evident by his choice of words: (1)

REDACTED

(2)

(3)

(4)

(5)

..... (emphasis added). Accordingly, paragraph 13 of the Hitz Declaration should be stricken by the Court.

9. Sun objects to paragraph 14 of the Hitz Declaration on the grounds that it is argumentative, speculative and lacks foundation. Evid. Code § 602. Specifically, Mr. Hitz has not and cannot articulate any personal knowledge regarding what third party companies might do in the future. Additionally, the last sentence of paragraph 14 is an improper and inadmissible

1 legal conclusion. Evid. Code § 701. Because Mr. Hitz is not qualified to express a legal opinion
 2 and has not been designated by NetApp as an expert regarding damages, testimony regarding
 3 development costs is inadmissible. Evid. Code § 701. Accordingly, paragraph 14 of the Hitz
 4 Declaration should be stricken by the Court.

5 10. Sun objects to paragraph 15 of the Hitz Declaration on the grounds that it is
 6 argumentative, speculative and lacks foundation. Evid. Code § 602. Specifically, Mr. Hitz has
 7 not and cannot articulate any personal knowledge regarding the number of **REDACTED**
 8 ' in the data storage space in the future. Indeed, this paragraph is based entirely on
 9 Mr. Hitz' prophesies and not on any personal knowledge. Accordingly, paragraph 15 of the Hitz
 10 Declaration should be stricken by the Court.

11 11. Sun objects to the following sentence in paragraph 16 of the Hitz Declaration on
 12 the grounds that it is argumentative and an improper and inadmissible legal conclusion:

13 **REDACTED**

14 Evid. Code § 701. Because Mr. Hitz is not
 15 qualified to express a legal opinion and has not been designated by NetApp as an expert regarding
 16 legal issues, testimony from a lay person regarding whether Sun's ZFS technology **REDACTED**
 17 is inadmissible. Evid. Code § 701. Accordingly, the
 18 aforementioned sentence in paragraph 16 of the Hitz Declaration should be stricken by the Court.

19 12. Sun objects to the first sentence in paragraph 17 of the Hitz Declaration on the
 20 grounds that it is argumentative, thereby violating Local Rule 7-5(b). Accordingly, paragraph 17
 21 of the Hitz Declaration should be stricken by the Court.

22 13. Sun objects to paragraph 18 of the Hitz Declaration on the grounds that it is
 23 argumentative, speculative and lacks foundation. Evid. Code § 602. Specifically, Mr. Hitz'
 24 speculation as to events that may occur in the future is inadmissible as it not based on any
 25 personal knowledge. For example, Mr. Hitz declares that **REDACTED** and that
 26 **REDACTED** (emphasis added). Such speculative statements are
 27 inadmissible. Accordingly, paragraph 18 of the Hitz Declaration should be stricken by the Court.

28 14. Sun objects to paragraph 19 of the Hitz Declaration on the grounds that it is

1 argumentative, speculative and lacks foundation. Evid. Code § 701. Specifically, paragraph 19
 2 fails to set forth any *facts* of which Mr. Hitz has personal knowledge. Accordingly, paragraph 19
 3 of the Hitz Declaration should be stricken by the Court.

4 15. Sun objects to paragraph 20 of the Hitz Declaration on the grounds that it is
 5 argumentative, speculative and lacks foundation. Evid. Code § 602. Specifically, Mr. Hitz has
 6 not and cannot articulate any personal knowledge regarding what the open source community
 7 might do in the future. Mr. Hitz' lack of personal knowledge is evident based on his use of the
 8 words "*may*" and "*it is possible.*" (emphasis added). Moreover, Mr. Hitz' testimony that "[i]t
 9 certainly doesn't help the open source movement to give away code that infringes someone else's
 10 patent rights" and that the "sooner we determine the true status of ZFS, the better it will be for
 11 everyone" is nothing more than pure argument and not based on any personal knowledge or facts.
 12 Accordingly, paragraph 20 of the Hitz Declaration should be stricken by the Court.

13 16. Sun objects to the last sentence of paragraph 21 of the Hitz Declaration on the
 14 grounds that it is argumentative, speculative and lacks foundation. Evid. Code § 602.
 15 Specifically, Mr. Hitz has not and cannot articulate any personal knowledge regarding what
 16 startups and vendors are considering in terms of a file storage system. Accordingly, the last
 17 sentence of paragraph 21 of the Hitz Declaration should be stricken by the Court.

18 **DECLARATION OF STEPHEN G. KUNIN**

19 Expert testimony is admissible if "scientific, technical or other specialized knowledge will
 20 assist the trier of fact to understand the evidence or to determine a fact in issue." Fed. R. Evid.
 21 702. Courts generally limit the use of legal expert testimony because it does not provide the court
 22 with the benefit of any such specialized knowledge. *See, e.g., United States v. Scholl*, 166 F.3d
 23 964, 973 (9th Cir. 1999).

24 Here, the Kunin Declaration is not based on any specialized knowledge and, in fact, does
 25 nothing to assist the trier of fact in determining whether to grant Sun's motion for partial stay.
 26 Rather, the Kunin Declaration consists of nothing more than unsupported conclusions and
 27 arguments. As such, the following paragraphs of the Kunin Declaration should be stricken.

28 1. Sun objects to paragraphs 2 and 3 of the Kunin Declaration on the grounds that

1 they are irrelevant and an improper expert opinion as they do not assist the trier of fact to
 2 understand the evidence or to determine a fact in issue. Evid. Code §§ 402, 702. Rather, these
 3 paragraphs merely recite case law, which is improper for an expert declaration.¹ Additionally,
 4 these paragraphs discuss a recent Federal Circuit case – *In re Reuning*, ___ F.3d ___ (Fed. Cir.
 5 2008) – which discusses the duration of the patent prosecution process; not the duration of the
 6 reexamination process. As such, this case (and any testimony relating thereto) is irrelevant to the
 7 issues the Court needs to consider in deciding Sun’s motion for partial stay. Accordingly,
 8 paragraphs 2 and 3 of the Kunin Declaration should be stricken by the Court.

9 2. Sun objects to paragraph 4 of the Kunin Declaration on the grounds that it is an
 10 improper expert opinion. Evid. Code § 702. First, Mr. Kunin declares that he will “summarize
 11 the available statistics regarding the outcomes of patent reexaminations.” Such a “summary,”
 12 however, is an improper expert opinion as it does not provide any “scientific, technical or other
 13 specialized knowledge” that will “assist the trier of fact to understand the evidence or to
 14 determine a fact in issue.” Second, and even more problematic, is Mr. Kunin’s testimony that the
 15 data regarding *inter partes* reexaminations “is too sparse to draw any meaningful or reliable
 16 conclusions.” Mr. Kunin is not (nor does he purport to be) a statistician or other professional
 17 qualified to draw conclusions as to what constitutes a statistically significant sample. As such,
 18 any testimony regarding what constitutes sufficient (or insufficient) sample sizes is inadmissible.
 19 Accordingly, paragraph 4 of the Kunin Declaration should be stricken by the Court.

20 3. Sun objects to paragraphs 17-28 and 30-35 on the grounds that these paragraphs
 21 are improper expert opinions. Specifically, Mr. Kunin is simply reciting information that is in the
 22 public record and does not offer any “scientific, technical or other specialized knowledge” that
 23 will “assist the trier of fact to understand the evidence or to determine a fact in issue.” Evid.

24
 25 ¹ Mr. Kunin should be well aware of the well-established rule precluding legal opinions. In 2005, the
 26 United States District Court for the District of Oregon struck portions of Mr. Kunin’s declaration on this
 27 very basis. *See Smith & Nephew, Inc. v. Biomet, Inc.*, 2005 WL 3132313, *2 (D. Or. Nov. 21, 2005)
 28 (striking portions of Kunin’s declaration that merely recite the law).

1 Code § 702. Accordingly, paragraphs 17-28 and 30-35 of the Kunin Declaration should be
2 stricken by the Court.

3 4. In addition to the objection set forth above, Sun further objects to paragraph 20 of
4 the Kunin Declaration on the grounds that it is speculative, conclusory and lacks foundation.
5 Evid. Code § 602. Specifically, Mr. Kunin fails to state any foundation for his bald conclusory
6 assertion that “initial rejections are typically made shortly after the order granting reexamination
7 in *inter partes* reexamination proceedings” and that “[i]t is common and usual occurrence that
8 initial rejections are issued by an Examiner in approximately 90% of all *inter partes*
9 reexaminations.” Additionally, Mr. Kunin’s testimony is particularly problematic given his
10 testimony in paragraph 4 that the available data is “too sparse to draw any meaningful or reliable
11 conclusions.” Indeed, Mr. Kunin’s ability to draw conclusions in paragraph 20 regarding the
12 *inter partes* reexamination proceedings directly contradicts his earlier testimony that the data is
13 too “sparse” to reach any reliable conclusion. Accordingly, paragraph 20 of the Kunin
14 Declaration should be stricken by the Court.

15 5. In addition to the objection set forth above, Sun further objects to paragraph 29 of
16 the Kunin Declaration on the grounds that it is speculative, conclusory and lacks foundation.
17 Evid. Code § 602. Specifically, Mr. Kunin declares that in his “opinion, 12 reexamination
18 certificates is an insufficiently large sample size to project an accurate percentage of how many
19 reexamination certificates will issue in the future....” Again, Mr. Kunin is not (nor does he
20 purport to be) a statistician or other professional qualified to draw conclusions as to what
21 constitutes a statistically significant sample. As such, Mr. Kunin cannot provide an expert
22 opinion as to whether a sample size is sufficiently or insufficiently large to draw a conclusion.
23 Accordingly, paragraph 29 of the Kunin Declaration should be stricken by the Court.

24 6. Sun objects to paragraph 44 of the Kunin Declaration on the grounds that it is
25 speculative, contradictory and lacks foundation. Mr. Kunin’s testimony is particularly
26 problematic given his testimony in paragraph 4 that the available data is “too sparse to draw any
27 meaningful or reliable conclusions.” Mr. Kunin’s ability to draw conclusions in paragraph 44
28 regarding the pendency ranges for *inter partes* reexaminations directly contradicts his earlier

1 testimony that the data is too "sparse" to reach any reliable conclusion. Moreover, Mr. Kunin's
 2 "statistical analysis" directly contradicts Exhibits G and I attached to the Kunin Declaration
 3 which indicate that the average pendency of an *inter partes* reexamination is 28.5 months, and the
 4 average pendency of an *ex parte* reexamination is 24 months. Accordingly, paragraph 44 of the
 5 Kunin Declaration should be stricken by the Court.

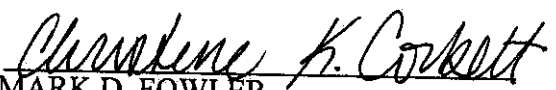

6 7. Sun objects to paragraphs 45-50 of the Kunin Declaration on the grounds that they
 7 are speculative, conclusory, contradictory and lack foundation. Evid. Code § 602. Specifically,
 8 the testimony in paragraphs 45-50 do not provide any "scientific, technical or other specialized
 9 knowledge" that will "assist the trier of fact to understand the evidence or to determine a fact in
 10 issue." Rather, Mr. Kunin's testimony is based entirely on speculation and unsupported
 11 conclusions. For example, Mr. Kunin fails to acknowledge that in 14 of the 15 *inter partes*
 12 reexamination proceedings, the patent claims were rejected during reexamination and, realizing
 13 the futility, the patent owners abandoned future prosecution of those claims. Moreover, Mr.
 14 Kunin's testimony is particularly problematic given his testimony in paragraph 4 that the
 15 available data is "too sparse to draw any meaningful or reliable conclusions." Indeed, Mr.
 16 Kunin's ability to draw conclusions in paragraphs 45-50 regarding the *inter partes* reexamination
 17 proceeding directly contradicts his earlier testimony that the data is too "sparse" to reach any
 18 reliable conclusion. Accordingly, paragraphs 45-50 of the Kunin Declaration should be stricken
 19 by the Court.

20 II. CONCLUSION

21 Sun respectfully requests that the Court sustain the above objections and strike the
 22 evidence referred to above.

23 Dated: May 5, 2008
